

ABHAY KUMAR YADAV

Agentic AI Developer | RAG & Multi-Agent Systems

[GitHub](#) | [LinkedIn](#) | +919631289175 | abhayyadav96312@gmail.com | Mohali, India

Professional Summary

B.Tech IT student specializing in Agentic AI and RAG systems — building multi-agent workflows and context-aware retrieval pipelines with LangChain, LangGraph, and vector embeddings. Backed by strong DSA fundamentals (1700+ LeetCode rating) and full-stack execution to ship production-ready AI products end-to-end.

Technical Skills

Languages: C++, JavaScript, Python

Frontend: React.js, HTML, CSS

Backend: Node.js, Express.js, REST APIs, WebSockets,

Databases: MongoDB, PostgreSQL, MySQL, NeonDB, Firebase

AI / GenAI: Generative AI, Agentic AI, RAG, LangChain, LangGraph, LangSmith, Embeddings, Vector Databases

Tools: Git, GitHub, Postman, Vercel, Railway

Core Skills: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Projects

Employee Copilot — AI-Powered Enterprise Workplace Assistant May 2026 – June 2026

React.js, Express.js, PostgreSQL/NeonDB, Gemini, LangChain, LangGraph, LangSmith, pgvector, RAG

[Live](#) | [GitHub](#)

- Designed an agentic RAG workflow with **LangGraph and LangChain**, orchestrating intent routing and tool calls across **21+ REST APIs** — 6 conversation, 6 document, and 9 leave-management endpoints.
- Built a document ingestion and versioning pipeline with pgvector semantic search, permission-filtered retrieval, RBAC, and policy rollback.
- Integrated Gmail and Google Calendar using OAuth, with human-in-the-loop approval for sensitive actions and LangSmith instrumented **LangSmith tracing** to monitor agent runs, tool calls, latency, and failures.

GD Arena — AI-Powered Group Discussion Practice Platform Jan 2026 – Mar 2026

MERN Stack, Groq AI, Gemini, LangChain, pgvector, NeonDB, Deepgram, WebSockets, REST APIs

[Live](#) | [GitHub](#)

- Built a real-time multi-agent Group Discussion platform supporting **2 concurrent AI agents** per session using LangGraph and LangChain, with a token-efficient rolling summarization system that reduced LLM token usage.
- Integrated **Groq AI, Gemini, and Deepgram** for real-time multi-agent voice interaction, enabling automated GD topic management and performance evaluation.
- Built StudyMate as an integrated PDF-based RAG assistant using LangChain, embeddings, pgvector, and Gemini, implementing document chunking, semantic retrieval, context construction, and AI-generated responses.

Nagar Sahayata Portal — Smart Civic Complaint Management System Jul 2025 – Sep 2025

MERN Stack (MongoDB, Express.js, React.js, Node.js), JWT, RBAC, Cloudinary, REST APIs

[Live](#) | [GitHub](#)

- Engineered **20+ REST APIs** with Node.js, Express.js, JWT, and RBAC across 3 roles, enabling complaint routing across **10+ government departments**.
- Implemented a secure complaint lifecycle spanning submission, assignment, field execution, image verification, and status tracking, backed by a MongoDB schema with Cloudinary-based proof-of-completion uploads.
- Built role-based dashboards in React.js for complaint tracking, task assignment, and status management; selected as a College Finalist at Smart India Hackathon 2025.

Education

Bachelor of Technology in Information Technology

Chandigarh Group of Colleges, Landran | CGPA: 8.8 / 10

2023 – 2027

Achievements

- LeetCode: 1700+ Contest Rating | [Profile](#)
- GeeksforGeeks: Ranked Top 10 on Coding Practice Platform | [Profile](#)
- College Finalist, Smart India Hackathon 2025 (Nagar Sahayata Portal).
- Completed MERN Stack Industrial Training (2025).
- Campus Mantri, GeeksforGeeks.
